

# Savannah<sup>TM</sup> S

**ROUND IS COOL**

LIGHT AIRCRAFT

# SAVANNAH S

## THE MULTI-PURPOSE ULTRALIGHT AIRCRAFT IDEAL FOR BUSH AND TRAVEL!

A growing fleet of around 3000 aircraft sold, well explains the achieved reputation to be a reliable partner for flight schools and sport pilots.

Thanks to its vortex generators and flaps, the Savannah is a safe, comfortable and funny ultralight that offers a speed range from 48 to 200 km/h. The junker flaperons allow the Savannah to maintain an excellent maneuverability on the roll even at very low speed. This aspect represents an important safety advantage when landing in the countryside.

### TECHNICAL SPECIFICATIONS

#### Engine type

Rotax 912 ULS/iS 100 Hp  
Rotax 912 UL 80 Hp

#### Propellers

Duc  
E-props  
Ivoprop

#### Dimensions

Wing span 9 m  
Wing area 11.88 sqm  
Length 6,6 m  
Height 2,58 m  
Cabin width 1,16 m

#### Fuel

2x 36 lts tanks  
(optional 4x 36 lts)  
+ 6 lts collector tank

#### Speeds

Stall 48 km/h  
Cruise 175 km/h  
VNE 230 km/h

#### Distances

Take off run 50 m  
Landing run 75 m

# REALIZE YOUR DREAM, BUILD YOUR OWN ULTRALIGHT

Savannah kits are affordable and easy to build.

The detailed assembly manual will guide you step by step through the components easily identifiable by a code. The kits are modular and available in different levels of advancement, from the basic KIT# 1 up to the partially built and painted KIT# 5, you'll just have to assemble the parts.

Estimated assembly time, excluding painting and upholstery, is between 110 and 350 hours.

A wide range of accessories allows the builder to customize the Savannah according to their wishes and needs.

## HIGHLIGHTS

- Generous dimensions of the cabin grant more leg room for pilot
- Luggage capacity up to 20 kg
- Panoramic views thanks to fully transparent doors
- Fully customizable instrument panel, from vintage analog to full glass cockpit with autopilot
- Three different types of tires available, from 4" with fairings for cruising to *tundra* for countryside
- Many accessories to choose from to make it unique

## TAILDRAGGER

The Savannah™ S Taildragger has been conceived to maximize STOL features of the airplane, improving its use on uneven terrain and unprepared runways.

I.C.P. is an Italian company founded in 1980 as a family business, which today has become a company of international relevance, thanks to R&D investments and continuous innovation.

We are one of the most important Italian companies among aircraft manufacturers. We produce light aircraft in aluminum alloy, recognized worldwide for their strength and safety characteristics.

Over the years we have developed an highly technological industrialization process of the product and, thanks to our investment in CNC machinery, we produce all the details of the aircraft in series.

In this way we optimize costs, facilitate the assembly and maintenance of the aircraft, that are sold all over the world as well as ready to fly or assembly kits.

I.C.P. is one of the first companies that obtained the ISO 9001 certification in the aeronautical field. We are certifying our airplanes according to the EASA CS-23 Amdt.5 regulation with consequent DOA and POA.
